

LISTING OF CLAIMS:

Claims 1 to 12. (Canceled).

13. (Previously Presented) A device, comprising:

a glow plug including a housing via which the glow plug is mounted inside a cylinder head of an internal combustion engine, the glow plug further including at a first end a heating pin that projects at least partially into a combustion chamber of the internal combustion engine when the glow plug is installed, the heating pin being affixed inside the glow plug with the aid of a fixation member; and

a sensor situated in the housing between the fixation member and a second end of the glow plug, the sensor disposed separately from the heating pin, in a force-locking manner between the fixation member and a fixation element implemented with prestressing, the fixation element being a sleeve crimped with the housing.

Claims 14 to 19. (Canceled).

20. (Previously Presented) The device according to claim 13, wherein the sensor is separated from the fixation member by at least one spacer member.

Claim 21. (Canceled).

22. (Previously Presented) The device according to claim 20, wherein the spacer member is an intermediate sleeve.

23. (Previously Presented) The device according to claim 22, wherein the intermediate sleeve is made of graphite.

Claims 24 to 26. (Canceled).

27. (Previously Presented) The device according to claim 13, wherein the sensor is a force sensor embodied as a piezo ring.
